GMC Number:

PROFILE

An experienced adult and paediatric emergency physician with a passion for all aspects of emergency medicine possessing a broad range of skills and knowledge. Adopts a strong work ethic; driven to enhance and improve standards of emergency care within both small district hospitals and large trauma centres and pivotal in driving changes in practice whilst at XXX and XXX Hospital. A competent and confident decision-maker who is able to remain calm under pressure; a proactive team player with excellent communication skills and successful at motivating and inspiring others. Completing my CCT in August 2021 and looking forward to a consultant role in emergency medicine with an opportunity to pursue an interest in teaching.

2017	Membership of the Royal College of Emergency Medicine	Royal College of Emergency Medicine
2013	Bachelor of Medicine, Bachelor of Surgery	XXX Medical School
Etc...		

CAREER HISTORY

Aug 2020 – present	ST6 Emergency Medicine , XXX District Hospital
Aug 2019 – July 2019	ST5 Emergency Medicine , XXX NHS Trust
Aug 2018 – July 2019	ST4 Emergency Medicine , XXX NHS Trust
Etc ...	

CLINICAL EXPERIENCE

General emergency

- Experienced in practising the following procedures independently and supervising trainees:
 - procedural sedation using propofol and other agents*
 - emergency ultrasound (have gained Level 1 Ultrasound sign-off)*
 - reduction of dislocation/fracture, POP application*
 - wound management*
 - chest drain insertion, advanced airway management & central venous and arterial cannulation*
 - arterial blood gas sampling and analysis*
 - pleural tap and aspiration*
 - ascitic tap, abdominal paracentesis*
 - DC cardioversion, temporary pacing*
 - FAST Scan, Echo, AAA scan*
 - catheterization including supra pubic catheter*
 - lumbar punctures*
 - nerve blocks (including fascia ilica block, haematoma block, ring block)*
 - knee aspirations*
 - normal vaginal delivery*
- Ensured a smooth flow of patients through managing the “symphony” system overseeing the management of patients in all areas of the Emergency Department at XXX Hospital
- Proficient in working independently as on-call rota doctor in other specialities including Surgery, Critical Care and A&E
- Supportive with interventional triage of patients
- Experienced in supervising specialist trainees in emergency medicine and allied specialities
- Managed out-of-hours service rota for trainees
- Competent at dealing with police report requests

Trauma

- Competent in dealing with trauma cases including penetrating types of trauma cases (including knife crime) and blunt (including assaults, road traffic incidents and collision)
- Experienced and skilled in supervising trainees to safely manage trauma cases

Name

Paediatric emergency medicine

- Demonstrated the ability to make pragmatic and rapid decisions across a broad range of paediatric emergencies
- Liaises effectively with hospital and community specialist paediatric emergency medicine (PEM) teams
- Able to lead on managing minor traumas to resuscitation of children

Etc ...

MANAGEMENT EXPERIENCE, AUDITS & QUALITY IMPROVEMENT

General Management

- Experienced in formulating answers to complaints and written statements for the coroner and police
- Chaired and presented at Mortality & Morbidity meetings
- Regularly act up as the EPIC (Emergency Physician in Charge) at XXX Emergency Department, supervising and liaising with doctors, nurses and the management team
- Completed a three-day Management & Leadership course

Audits

- **Findings:** I carried out a retrospective review of case notes of patients who presented over a 7-day period who had antibiotics prescribed and audited the notes against the RCEM September 2019 Clinical Standards for EDs that 50% antibiotics should be administered within one hour of attendance and 100% before leaving the emergency department
Conclusion: Disseminated findings to staff to highlight need for early administration of antibiotic and highlighted use of sepsis proforma
Emergency Department, XXX Hospital
- **Findings:** I retrospectively audited all patients who presented following a needlestick injury against CEM guidance; adherence was poor.
Conclusion: Introduced a 'needlestick injury proforma'
Emergency Department, XXX Hospital

Quality Improvement

- Examined the time taken for bloods taken on the acute medical unit to be processed and introduced a red bag system which sped up the time taken for bloods to be processed reducing the time from taken for bloods to be reported from 138 minutes to 71 minutes.
- Initiated and created an admission proforma to standardise the admission process whilst working on a joint elderly medicine and critical care ward at XXX Hospital

Etc ...

TEACHING EXPERIENCE

- Co-created the website www.XXX.com; this is an online revision and question resource for the MCEM Part A written paper; I created and manage the question bank, which is currently at 450 questions and respond to feedback from subscribers. It gains sign-ups on a daily basis from all over the world; there are currently over 1000 subscribers.
- Act as instructor on the IMPACT course (Ill Medical Patients Acute Care and Treatment)
- Taken up the role of ALS instructor
- Regularly teach students on aspects of emergency care and encourage written feedback to improve my teaching skills; designed the XXX Medical School introductory presentation module on Musculoskeletal medicine for fourth year medical students.
- Undertook role of examiner for clinical exams at XXX University Undergraduate Medical Course
- Act as a mentor for a trainee Advanced Clinical Practitioner
- Routinely teach basic clinical skills to medical students and junior doctors for both small and large group teaching sessions, lectures and bedside teaching
- Completed the 'Training the Trainers' 3-day teaching skills course with XXX Deanery
